

### AMENDMENT TO ABSTRACT

Kindly replace the Abstract with the following:

A method for digitally signing a message by generalizing the OSS (Ong, Schnorr, and Shamir) signature method to include approximations. is described. ~~The method includes providing a message digest  $(M_x, M_z)$ , providing a modulus  $N$ , providing a number  $V$  in the ring  $Z_N$ , wherein for another number  $S$  in the ring  $Z_N$ ,  $V \cdot S^2 = 1$  in  $Z_N$ , solving the equation  $(M_x + x)^2 - V \cdot y^2 = 4 \cdot (M_z + z)$  in  $Z_N$  to produce  $x$ ,  $y$ , and  $z$ , and assigning  $SIG$  as the signature of  $(M_x, M_z)$ , wherein  $SIG$  includes  $(x, y)$ . Related methods and apparatus are also described.~~
